# POWERED BY PERFORMANCE

Competing at the highest level means consistently delivering uncompromising performance, and that's exactly what Srixon golf balls are built to do. Designed with cutting-edge features and a fierce dedication to your game, our golf balls continue to propel the world's best to victories on top tours around the globe. And even if you're not chasing championship wins, our deep lineup of offerings gives players of any ability powerful performance for their most competitive moments.

## Z-STAR

Z-STAR provides maximum greenside spin for unmatched control and stopping power. Its premium 3-piece construction gives skilled players complete tour performance, tee to green.

## Z-STAR ♦

With a blend of greenside control and long-game distance, the new Z-STAR ♦ DIAMOND also delivers the unique benefit of increased spin on long and mid Iron shots.

## Z-STAR XV

Z-STAR XV provides maximum ball speed for unmatched Driver and Iron distance. Its premium 3-piece construction gives skilled players complete tour performance, tee to green.

## Z-STAR DIVIDE™

Z-STAR DIVIDE has all the benefits of the Z-Star but with added visual performance. Better align your putts, really see your wedge spin and follow the ball more clearly through the air on all shots from tee to green.

## Q-STAR TOUR

The all-new Q-STAR TOUR delivers tour-level performance in a reworked, 3-piece urethane design. Q-STAR TOUR features a lower compression rating for a satisfying, softer feel, long distance, and more greenside spin—with technology upgrades like a Thin, Premium Urethane Cover with Biomass plus Spin Skin+ Coating.

## Q-STAR TOUR DIVIDE

Q-STAR TOUR DIVIDE welcomes an all-new 50/50 gloss finish with Spin Skin+ Coating and all-new, vibrant colorways. This 3-piece design now features the same urethane cover as the classic Q-STAR TOUR ball, as well as the same performance tech. Plus, DIVIDE's unique 50/50 cover makes spin clearly visible and putting alignment easier than ever.

## Q-STAR ULTISPEED with TRACKLINE

New to the Srixon golf ball lineup, Q-STAR ULTISPEED with TRACKLINE features a two-stamp layout specifically designed to help players line up putts more confidently and gain more visual spin feedback, while also giving the ball a cool, bold look. And, true to its ULTISPEED DNA, Q-STAR ULTISPEED with TRACKLINE delivers blistering ball speeds and outperforms virtually every expectation of a distance-focused golf ball.

NEW

## AD333

AD333 delivers incredible distance performance and feel in a lower-compression, 2-piece design, and now features foil- and plastic-free packaging for reduced waste. With slightly lower compression and softer feel than last generation, the new AD333 provides more distance, feel, and control than ever before.

## SOFT FEEL

Whether off the tee, approaching, or around the greens, SOFT FEEL lives up to its name. Experience incredible softness with a solid yet comfortable impact on every swing, plus enhanced distance—giving you more confidence as you address each shot.

## SOFT FEEL LADY

With incredible softness off the tee or around the greens, the SOFT FEEL LADY also provides a higher launch. That increased launch angle, combined with the average woman's swing offers game-changing distance and feel on every shot.

## ULTI SOFT

ULTISOFT is true to its name as the ultimate golf ball for softness and feel. It's the lowest compression ball in our lineup, delivering unmatched performance on every strike.

## DISTANCE

It's all in the name: the Srixon DISTANCE golf ball goes far. Whether off the tee or from the fairway, hitting woods or irons, DISTANCE helps all your shots carry further and puts you in position to score.

# Z-STAR XV

## MAXIMUM DISTANCE

Z-STAR XV provides maximum ball speed for unmatched Driver and Iron distance. Its premium 3-piece construction gives skilled players complete tour performance, tee to green.

### NEW Thin, Premium Urethane Cover with Biomass

Every Z-STAR Series golf ball features a newly formulated, extra thin, premium urethane cover made with biomass. They're a challenge to manufacture, but our engineers put in the time to create a cover with unmatched performance and tour-level stopping power around the greens.

### NEW FastLayer DG Core 2.0

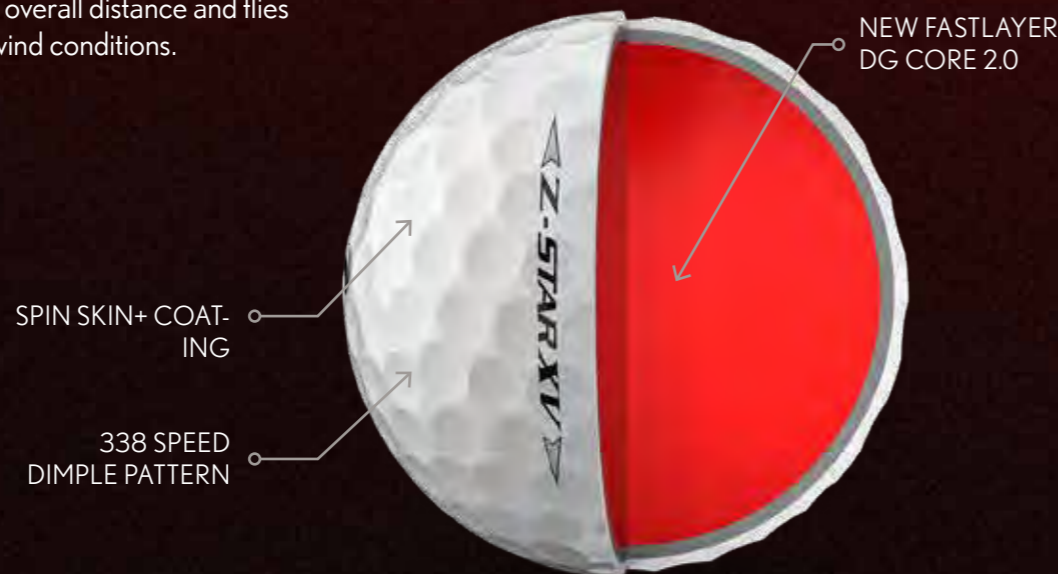

A newly formulated core starts soft in the center and dramatically becomes firm around its edge, giving high-speed players more Iron spin and plenty of ball speed for maximum distance.

### Spin Skin+ Coating

A durable coating, Spin Skin+ digs deep into Wedge and Iron grooves, maximizing spin for better control and stopping power, while also improving the cover's resistance to dirt and grime.

### 338 Speed Dimple Pattern

Less drag and more lift boosts overall distance and flies straight, even in the toughest wind conditions.

Available in both Pure White and Tour Yellow

# Z-STAR DIVIDE

## MAXIMUM SPIN

Z-STAR provides maximum greenside spin for unmatched control and stopping power. Its premium 3-piece construction gives skilled players complete tour performance, tee to green.

### 50/50 Visual Performance

DIVIDE's spinning strobe effect lets you easily see the degree and rate of Wedge spin change as you adjust face angle and swing speed. And DIVIDE's one-of-a-kind, 360° seam line helps perfect your aim and roll on the greens.

### NEW Thin, Premium Urethane Cover with Biomass

Every Z-STAR Series golf ball features a newly formulated, extra thin, premium urethane cover made with biomass. They're a challenge to manufacture, but our engineers put in the time to create a cover with unmatched performance and tour-level stopping power around the greens.

### NEW FastLayer DG Core 2.0

A newly formulated core starts soft in the center and gradually becomes firm around its edge, giving high-speed players exceptional feel and maximum approach shot spin.

### Spin Skin+ Coating

A durable coating, Spin Skin+ digs deep into Wedge and Iron grooves, maximizing spin for better control and stopping power, while also improving the cover's resistance to dirt and grime.

### 338 Speed Dimple Pattern

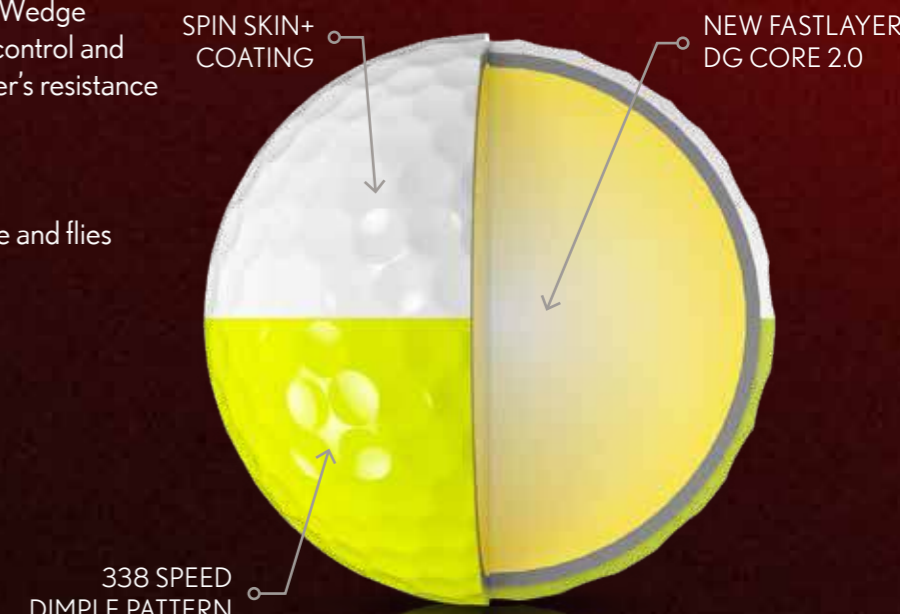

Less drag and more lift boosts overall distance and flies straight, even in the toughest wind conditions.

## Q-STAR TOUR

The all-new Q-STAR TOUR delivers tour-level performance in a reworked, 3-piece urethane design. Q-STAR TOUR features a lower compression rating for a satisfying, softer feel, long distance, and more greenside spin—with technology upgrades like a Thin, Premium Urethane Cover with Biomass plus Spin Skin+ Coating.

### NEW Thin, Premium Urethane Cover with Biomass

Every Q-STAR TOUR golf ball features an extra thin, premium urethane cover for tour-caliber greenside spin, feel, and control. Our latest covers are also made with Biomass—a durable, plant-derived material requiring fewer carbon emissions to manufacture. It's our signature, unbeatable performance and feel, plus a step toward reducing environmental impact.

### FastLayer Core

FastLayer uses a contrasting compression effect across the core to generate better ball speeds and distance. Q-STAR TOUR's unique FastLayer formula also offers a lower compression rating—helping players hit longer, straighter shots on low-lofted clubs and achieve a satisfying, softer feel on Iron and Wedge shots.

### NEW Spin Skin+ Coating

A durable coating, Spin Skin+ digs deep into Wedge and Iron grooves, maximizing spin for better control and stopping power, while also improving the cover's resistance to dirt and grime.

### 338 Speed Dimple Pattern

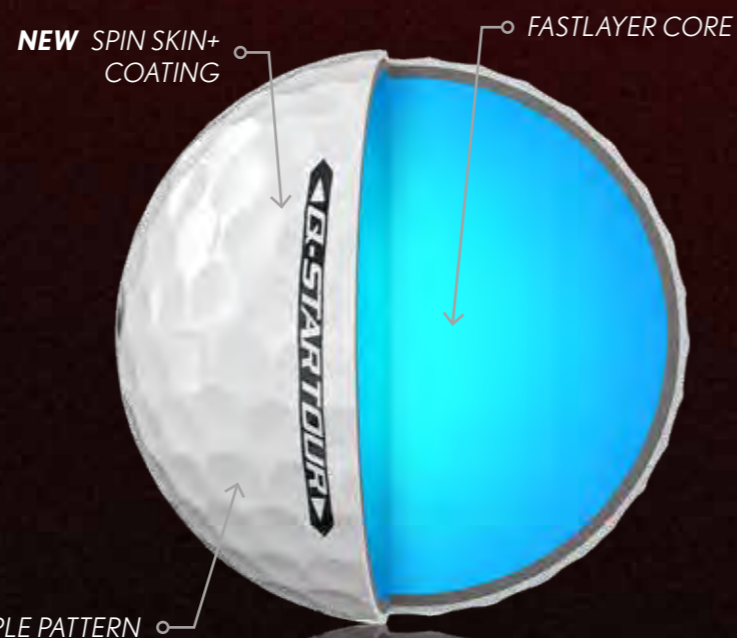

The 338 Speed Dimple Pattern on Q-STAR TOUR improves overall aerodynamics for better flight performance. A lower drag coefficient helps the ball cut through the air with less resistance for a more penetrating launch and straighter flight. A higher lift coefficient allows the ball to stay airborne longer for maximum distance.

Available in both Pure White and Tour Yellow

## Q-STAR TOUR DIVIDE

Q-STAR TOUR DIVIDE welcomes an all-new 50/50 gloss finish with Spin Skin+ Coating and all-new, vibrant colorways. This 3-piece design now features the same urethane cover as the classic Q-STAR TOUR ball, as well as the same performance tech. Plus, DIVIDE's unique 50/50 cover makes spin clearly visible and putting alignment easier than ever.

### 50/50 Visual Performance

DIVIDE's spinning strobe effect lets you easily see the degree and rate of Wedge spin change as you adjust face angle and swing speed. And DIVIDE's one-of-a-kind, 360° seam line helps perfect your aim and roll on the greens.

### NEW 50/50 Urethane Cover with Biomass

Every Q-STAR TOUR golf ball features an extra thin, premium urethane cover for tour-caliber greenside spin, feel, and control. Our latest covers are also made with Biomass—a durable, plant-derived material requiring fewer carbon emissions to manufacture. It's our signature, unbeatable performance and feel, plus a step toward reducing environmental impact.

### FastLayer Core

FastLayer uses a contrasting compression effect across the core to generate better ball speeds and distance. Q-STAR TOUR DIVIDE's unique FastLayer formula also offers a lower compression rating—helping players hit longer, straighter shots on low-lofted clubs and achieve a satisfying, softer feel on Iron and Wedge shots.

### NEW Spin Skin+ Coating

New for this generation, a durable coating we call Spin Skin+ digs deep into Wedge and Iron grooves, maximizing spin for better control and stopping power, while also improving the cover's resistance to dirt and grime.

### 338 Speed Dimple Pattern

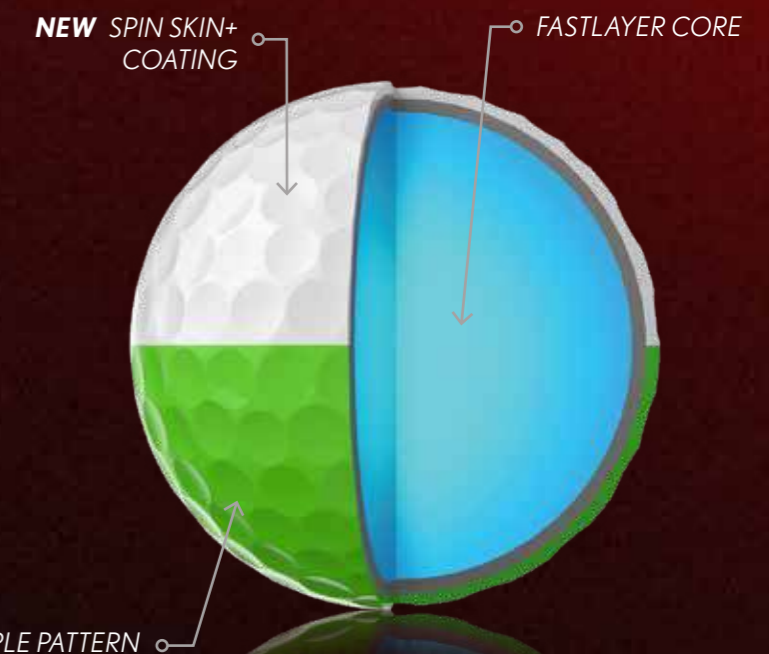

The 338 Speed Dimple Pattern on Q-STAR TOUR DIVIDE improves overall aerodynamics for better flight performance. A lower drag coefficient helps the ball cut through the air with less resistance for a more penetrating launch and straighter flight. A higher lift coefficient allows the ball to stay airborne longer for maximum distance.

Available in White/Pink, White/Lime Green, Yellow/Red and Yellow/Orange

# Q-STAR ULTISPEED WITH TRACKLINE

New to the Srixon golf ball lineup, Q-STAR ULTISPEED with TRACKLINE features a two-stamp layout specifically designed to help players line up putts more confidently and gain more visual spin feedback, while also giving the ball a cool, bold look. And, true to its ULTISPEED DNA, Q-STAR ULTISPEED with TRACKLINE delivers blistering ball speeds and outperforms virtually every expectation of a distance-focused golf ball.

### NEW TRACKLINE Visual Performance

The all-new TRACKLINE alignment system helps players line up putts more confidently and gain more visual spin feedback. This unique, two-stamp layout maintains the look of a traditional ball while offering full 360-degree visual benefits.

### FastLayer Core

ULTISPEED's FastLayer Core was meticulously developed over the past decade using new materials. This model minimizes the differences in hardness typically found in cores of other distance ball offerings but still uses our signature soft-to-firm approach. With a more subtle soft-to-firm transition, FastLayer enhances speed off the clubface to give ULTISPEED extreme distance on every swing.

### 338 Speed Dimple Pattern

The 338 Speed Dimple Pattern on ULTISPEED improves overall aerodynamics for better flight performance. A lower drag coefficient helps the ball cut through the air with less resistance for a more penetrating launch and straighter flight. A higher lift coefficient allows the ball to stay airborne longer for maximum distance.

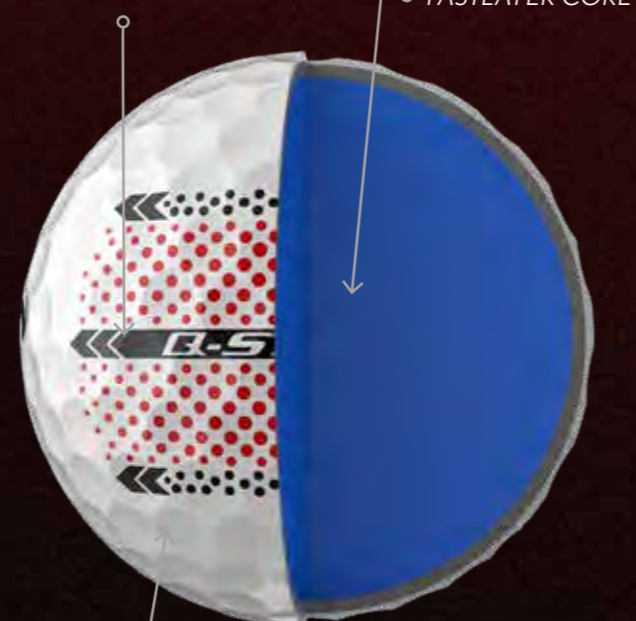

### Soft Thin Cover

Every ULTISPEED golf ball features a uniquely formulated cover that's thin and soft to provide more short Iron and greenside spin with a softer feel on pitches, chips, and putts, while still maintaining the high-speed benefits of a distance ball.

Available in Pure White

NEW TRACKLINE VISUAL PERFORMANCE

338 SPEED DIMPLE PATTERN

# AD333

AD333 delivers incredible distance performance and feel in a lower-compression, 2-piece design, and now features foil- and plastic-free packaging for reduced waste. With slightly lower compression and softer feel than last generation, the new AD333 provides more distance, feel, and control than ever before.

### FastLayer Core

FastLayer uses a contrasting compression effect across the core to generate better ball speeds and distance. But for this generation, we gently lowered the compression to promote longer, straighter flight on low-lofted clubs and a satisfying, softer feel on Iron and Wedge shots.

### Spin Skin

Made from highly flexible molecular bonds, Spin Skin is a specialized coating that's designed to dig deeper into club face grooves and maximize spin for more control and stopping power.

### 338 Speed Dimple Pattern

The 338 Speed Dimple Pattern on AD333 improves overall aerodynamics for better flight performance. A lower drag coefficient helps the ball cut through the air with less resistance for a more penetrating launch and straighter flight. A higher lift coefficient allows the ball to stay airborne longer for maximum distance.

### NEW Eco-Friendlier Packaging

The new AD333 continues to further Srixon's goal of reducing waste by using a new eco-friendly paper and completely eliminating silver foil from its already plastic-free packaging.

Available in both Pure White and Tour Yellow

338 SPEED DIMPLE PATTERN

# ULTISOFT

True to its name, UltiSoft is the ultimate golf ball for that truly soft feeling. It features the lowest compression in the Srixon lineup, delivering all-around performance across the course. And now, thanks to our FastLayer Core, UltiSoft gives you improved off-the-tee power.

### FastLayer Core

With a soft center that gradually transitions to a firm outer edge, the FastLayer Core gives UltiSoft incredible softness and great distance off the tee.

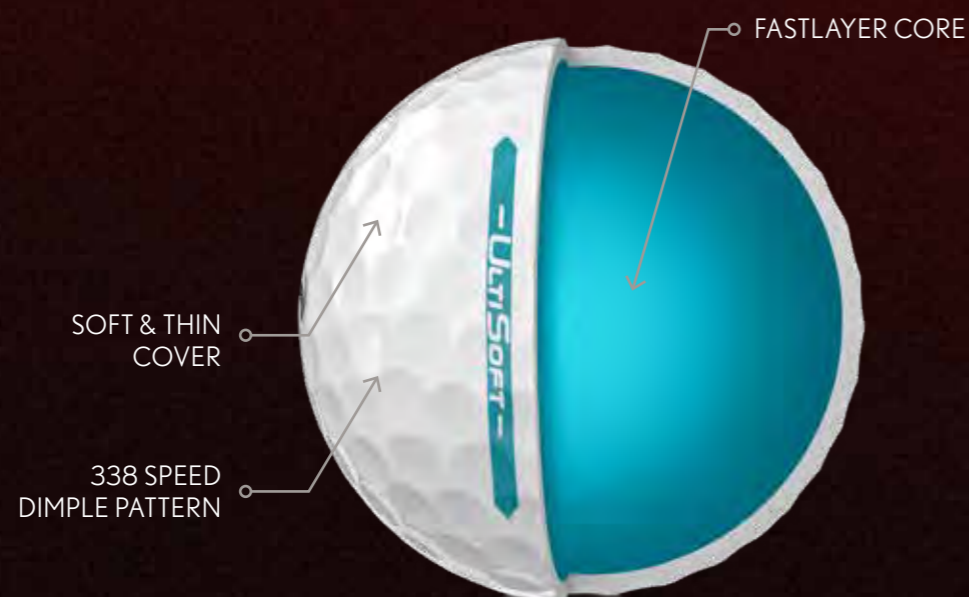

### 338 Speed Dimple Pattern

The 338 Speed Dimples on UltiSoft improve overall aerodynamics for better flight performance. A lower drag coefficient helps the ball cut through the air with less resistance for a more penetrating launch and straighter flight. A higher lift coefficient allows the ball to stay airborne longer for maximum distance.

### 338 Speed Dimple Pattern

To get more distance overall and better performance in the wind, Speed Dimples reduce drag at launch and increase lift during descent.

### Matte Visual Performance

Three Brite color options—Red, Orange, and Green—enhance visibility so it's easy to find your ball.

### Soft, Thin Cover

Provides more greenside spin and softer feel on all pitches, chips and putts.

Available in Brite Red, Brite Orange and Brite Green.

# DISTANCE

## PREMIUM DISTANCE

It's all in the name: the Srixon DISTANCE golf ball goes far. Whether off the tee or from the fairway, hitting woods or irons, DISTANCE helps all your shots carry farther and puts you in position to score.

### FastLayer Core

With a soft center that gradually becomes firmer around its edges, FastLayer delivers both speed and great feel. The result is distance without compromise.

### 324 Dimple Pattern

Aerodynamically tuned dimples slice through wind, keeping your ball on line and maximizing distance.

### Durable Ionomer Cover

A thin ionomer cover delivers ample greenside spin yet is durable enough to last shot after shot.

# ZXi LS DRIVER

The ZXi LS Driver's advanced low spin profile is a perfect match for players with aggressive swings who want to dominate the distance game. Two adjustable sole weights placed in the front and rear allow you to dial in your preferred spin characteristics for a lower ball flight and extra yards after carry.

## KEY INNOVATIONS:

### i-FLEX FACE

This completely redesigned face thickness pattern produces more efficient energy transfer at impact. The added strength of the interior i-FLEX face structure allows the center of the face to be thinner than last gen, increasing ball speed.

### REBOUND FRAME

Rebound Frame is an entirely unique system that amplifies energy transfer at impact. By utilizing two flex zones, instead of just one, Rebound Frame maximizes flex across the face to increase power, ball speed, and, ultimately, shot distance.

### ADJUSTABILITY

Two adjustable sole weights placed in the front and rear allow you to dial in your preferred spin characteristics. And an all-new, 1.5-degree hosel sleeve lets you fine tune Driver loft, lie, and face angle.

### STAR FRAME CROWN

Complex latticework creates the structural integrity necessary to support an ultralight, remarkably thin titanium crown, ultimately allowing discretionary mass to be set where it best suits each ZXi Driver's ideal launch and spin characteristics.

### LASER FACE MILLING

Brand new for ZXi Drivers, visible Laser Face Milling has been added to the surface to help stabilize spin and add forgiveness in wet conditions.

GRAPHITE SHAFT: Project X HZRDUS Black Gen 5 70/60

# ZXi WOODS

†To match USGA and R&A industry guidelines, Srixon has modified how club lengths are measured and published. Our published length specifications for Woods are now approximately 1/2" longer. Note: club lengths haven't changed, only how they are measured and recorded.

# ZXi DRIVER

The ZXi Driver combines blistering ball speed with exceptional MOI for a club that provides a player with superb drives and forgiveness while keeping spin relatively low. Two adjustable sole weights allow you to calibrate a preferred ball flight path with your personal swing characteristics.

## KEY INNOVATIONS:

### i-FLEX FACE

This completely redesigned face thickness pattern produces more efficient energy transfer at impact. The added strength of the interior i-FLEX face structure allows the center of the face to be thinner than last gen, increasing ball speed.

### REBOUND FRAME

Rebound Frame is an entirely unique system that amplifies energy transfer at impact. By utilizing two flex zones, instead of just one, Rebound Frame maximizes flex across the face to increase power, ball speed, and, ultimately, shot distance.

### ADJUSTABILITY

Two adjustable sole weights placed in the heel and toe allow you to adjust the swing weight and Center of Gravity to favor a draw or fade shot shape. And an all-new, 1.5-degree hosel sleeve lets you fine tune Driver loft, lie, and face angle.

### STAR FRAME CROWN

Complex latticework creates the structural integrity necessary to support an ultralight, remarkably thin titanium crown, ultimately allowing discretionary mass to be set where it best suits each ZXi Driver's ideal launch and spin characteristics.

### LASER FACE MILLING

Brand new for ZXi Drivers, visible Laser Face Milling has been added to the surface to help stabilize spin and add forgiveness in wet conditions.

<sup>†</sup>To match USGA and R&A industry guidelines, Srixon has modified how club lengths are measured and published. Our published length specifications for Woods are now approximately 1/2" longer. Note: club lengths haven't changed, only how they are measured and recorded.

# ZXi MAX DRIVER

Srixon's highest MOI Driver in the lineup, the ZXi MAX offers an easy swing feel and heightened forgiveness in a sharp, high-performance profile. A single adjustable weight placed low in the rear allows you to choose your preferred swing weight and maximize ZXi MAX's high MOI benefits for total confidence on the tee box.

## KEY INNOVATIONS:

### i-FLEX FACE

This completely redesigned face thickness pattern produces more efficient energy transfer at impact, increasing ball speed.

### REBOUND FRAME

Rebound Frame is an entirely unique system that amplifies energy transfer at impact. By utilizing two flex zones, instead of just one, Rebound Frame maximizes flex across the face to increase power, ball speed, and, ultimately, shot distance.

### ADJUSTABILITY

A single adjustable weight placed low in the rear allows you to choose your preferred swing weight and maximize ZXi MAX's MOI benefits. And an all-new, 1.5-degree hosel sleeve lets you fine tune Driver loft, lie, and face angle.

### STAR FRAME CROWN

Complex latticework creates the structural integrity necessary to support an ultralight, remarkably thin titanium crown, ultimately allowing discretionary mass to be set where it best suits each ZXi Driver's ideal launch and spin characteristics.

### LASER FACE MILLING

Brand new for ZXi Drivers, visible Laser Face Milling has been added to the surface to help stabilize spin and add forgiveness in wet conditions.

# ZXi FAIRWAYS

The all-new lineup of Srixon ZXi Fairway Woods boasts the tour-caliber ball speed and long-game performance necessary to top the leaderboard, while their refined shape and new adjustability options guarantee they'll be the talk of the clubhouse.

## KEY INNOVATIONS:

### i-FLEX FACE

This completely redesigned face thickness pattern produces more efficient energy transfer at impact, increasing ball speed.

### REBOUND FRAME

Rebound Frame is an entirely unique system that amplifies energy transfer at impact. By utilizing two flex zones, instead of just one, Rebound Frame maximizes flex across the face to increase power, ball speed, and, ultimately, shot distance.

### ADJUSTABLE HOSEL

An all-new, 1.5-degree hosel sleeve lets you fine tune every ZXi Fairway Wood's loft, lie, and face angle.

### CARBON CROWN & CROWN STEP

The 3+W and 3W use a strong, lightweight carbon crown, positioning mass low and maximizing COR. Their stepped crown design lowers the clubheads' CG for higher, longer shots. The 5W and 7W do not include a stepped crown, prioritizing improved spin and accuracy over distance.

# ZXi HYBRIDS

The all-new lineup of Srixon ZXi Hybrids offers even faster ball speeds, a new, larger head shape, and, for the first time, an adjustable hosel sleeve. All specifically designed to give you longer shots, inspire confidence at address, add forgiveness, and let you select your personal launch specs.

## KEY INNOVATIONS:

### i-FLEX FACE

This completely redesigned face thickness pattern produces more efficient energy transfer at impact, increasing ball speed.

### REBOUND FRAME

Rebound Frame is an entirely unique system that amplifies energy transfer at impact. By utilizing two flex zones, instead of just one, Rebound Frame maximizes flex across the face to increase power, ball speed, and, ultimately, shot distance.

### ADJUSTABLE HOSEL

For the first time, an all-new, 1.5-degree hosel sleeve lets you fine tune every ZXi Hybrid's loft, lie, and face angle.

### REFINED TOUR SHAPING

Progressive new shaping for ZXi Hybrids feature increased head size and volume, while the toe and back sides are also slightly larger than previous generation—all designed to add forgiveness and inspire more confidence at address.

# ZXiU UTILITY IRONS

ZXiU Utility Irons are potent long Iron replacements—even among tour pros—with elevated power, control, and forgiveness in a blade-like design with minimal offset.

## KEY INNOVATIONS:

### i-FORGED

Condensed Forging stretching from the high-toe area and along the topline of the Iron blade enhances overall strength, durability, and feel. Then the forged faces on ZXiU are softened to improve this already exceptional feel.

### MAINFRAME

MainFrame saves additional weight and adds more MOI through an enhanced network of milled channels on the back side of the Iron face. At impact, this system amplifies ball speed and adds forgiveness.

### TOUR V.T. SOLE

For the first time ever, we've included Tour V.T. Sole on all ZXiU Utility Irons, along with a leading-edge side chamfer. This proprietary combination of sole widths, bounce angles, and notches encourages a smooth glide through the turf without losing speed.

### UTILITY IRON SHAPING

Our widest soles, combined with minimal offset and an appealing look at address, makes our forgiving, hollow ZXiU Utility long Irons professional favorites.

# ZXi IRONS

# ZXi7 IRONS

A players' Iron with compact shaping and tour-preferred looks, made with all-new i-FORGED technology for the most supreme feeling Srixon Iron ever created. A single-piece forging delivers a sleek, highly-workable package.

## KEY INNOVATIONS:

### i-FORGED

Proprietary Condensed Forging inserts added strength in the hosel area, which allows for the use of new, softer S15C steel in the single-piece Iron body for unprecedented feel and control.

### PUREFRAME

This generation of PureFrame uses a larger forged ridge in the body of the Iron just behind the sweet spot. We've expanded this ridge for even better feel, stability, and control.

### TOUR V.T. SOLE

Our Tour V.T. Sole's proprietary combination of sole widths, bounce angles, and notches to ensure a smooth glide through fairway, rough, and sand without any loss of speed.

### PROGRESSIVE GROOVES

The 3i-7i feature wider grooves, while the 8i-AW have deeper, closer-set grooves to ensure consistent spin across the set. Laser milling between each groove, on every loft, enhances adds bite on every strike.

### PLAYERS IRON SHAPES

A thin topline, narrow sole, short blade, and minimal offset—the preferred look for tour-level and low-handicap golfers. These compact players Irons feature a muscle-back cavity for maximum workability and a razor-sharp look.

# ZXi5 IRONS

All-new ZXi5 Irons represent our most potent blend of power, playability, and ultra-sharp looks. Our revolutionary i-FORGED process, combined with the latest Srixon ball speed and distance technologies, gives ZXi5 Irons unprecedented feel, speed, and power on every shot.

## KEY INNOVATIONS:

### i-FORGED

Condensed Forging stretching from the high-toe area and along the topline of the Iron blade enhances overall strength, durability, and feel. Then the forged faces on ZXi5 are softened to improve this already exceptional feel.

### MAINFRAME

MainFrame saves additional weight and adds more MOI through an enhanced network of milled channels on the back side of the Iron face. At impact, this system amplifies ball speed and adds forgiveness.

### TOUR V.T. SOLE

Our Tour V.T. Sole's proprietary combination of sole widths, bounce angles, and notches to ensure a smooth glide through fairway, rough, and sand without any loss of speed.

### PROGRESSIVE GROOVES

The 3i-7i feature wider grooves, while the 8i-AW have deeper, closer-set grooves to ensure consistent spin across the set. Laser milling between each groove, on every loft, enhances adds bite on every strike.

### PLAYERS DISTANCE SHAPES

ZXi5 features a slightly wider sole with moderate blade length and offset, giving attuned golfers enhanced distance, forgiveness, and workability—all with an ultra-clean look at address.

# ZXi4 IRONS

With a clean look at address, forged feel, and hollow head design, ZXi4 delivers the heightened forgiveness you need in a compact shape you'll want to play.

## KEY INNOVATIONS:

### i-FORGED CONSTRUCTION

ZXi4 Irons feature a softer SUS17-47 material, which delivers dramatically better feel than previous generations of ZX4 Irons. This softer material allows us to adjust loft and lie more easily to ensure the perfect fit.

### MAINFRAME

MainFrame saves additional weight and adds more MOI through an enhanced network of milled channels on the back side of the Iron face. At impact, this system amplifies ball speed and adds forgiveness.

# Z-FORGED II IRONS

A muscle back blade Iron with player-preferred shaping, Z-Forged II offers exceptional feel and ultra-precise control. Designed in close collaboration with Srixon's professional tour staff, Z-Forged II features a razor-sharp address profile, forged construction, and a highly workable sole design for skilled players who want the most from forged feel and stunning looks.

## KEY INNOVATIONS:

### PUREFRAME

Carefully crafted from 1020 Carbon Steel, Z-Forged II features mid-height toe and heel features on the back of the club. This approach strategically relocates mass right where you strike the ball for unmatched feel, playability, and performance.

### BLADE SHAPING

Z-Forged II offers everything you'd expect from a contemporary blade design: a compact players' package with precision shaping and a stunningly clean address profile. Shaping on the back of the head optimizes CG location and MOI without sacrificing any of the feel or workability demanded by the purest of ball strikers.

Material: Forged 1020 Carbon Steel

4i 7i PW 4i 7i PW

### PROGRESSIVE GROOVES

The 3i-7i feature wide grooves, ideal for longer shots in all conditions. The 8i-PW have deeper, closer-set grooves which cut through grass and debris to enhance spin on approach shots. Laser milling between each groove, on every loft, enhances friction in all conditions.

### TOUR V.T. SOLE

Using a proprietary combination of sole-widths, bounce angles, and toe/heel notches, Tour V.T. Sole takes turf interaction to a whole new level of detail. Highly regarded by Srixon tour staff, this unique sole technology encourages a smooth glide through fairway, rough and sand so you can strike the ball solidly without losing speed.

**NEW ZXiR IRONS**

Crafted with obsessive detail to performance and style, ZXiR blends completely new materials and cavity back construction with signature Srixon aesthetics for a game improvement model that feels even better than it looks.

**KEY INNOVATIONS:**

**i-ALLOY**

i-ALLOY is a brand-new steel with better feel, created by Srixon. It's significantly softer than the 431 steel commonly used in this category, as well as less dense, while still meeting the strength and durability needs our brand demands.

**MAINFRAME**

MainFrame saves additional weight and adds more MOI through an enhanced milled pattern on the back side of the Iron face. At impact, this system amplifies ball speed and adds forgiveness.

**SIGNATURE SRIXON SHAPING**

ZXiR Irons advance Srixon's renowned design aesthetics into the game improvement space, while also cosmetically aligning with the entire ZXi Iron family—featuring premium, cavity back badging, confidence-inspiring shaping, and clean topline address profiles.

**TOUR V.T. SOLE**

Our Tour V.T. Sole's proprietary combination of sole widths, bounce angles, and notches to ensure a smooth glide through fairway, rough, and sand without any loss of speed.

**NEW ZXiR HL IRONS**

Srixon's first super game improvement model—made to give lower swing speed golfers a satisfying, high arcing ball flight path with increased spin—ZXiR HL (High Launch) Irons showcase signature Srixon design and pure feel, with the same cavity back benefits and forgiveness tech as ZXiR.

**KEY INNOVATIONS:**

**HIGH LAUNCH DESIGN**

ZXiR HL (High Launch) delivers premium Srixon performance and feel with specially tuned specs, lofts, and design to help lower swing speed golfers launch the ball higher, increase spin, and improve stopping power around the greens for optimal playability. All with Srixon's renowned design aesthetics to cosmetically align with the entire ZXi Iron family.

**I-ALLOY**

i-ALLOY is a brand-new steel with better feel, created by Srixon. It's significantly softer than the 431 steel commonly used in this category, as well as less dense, while still meeting the strength and durability needs our brand demands.

<sup>1</sup>To match USGA and R&A industry guidelines, Srixon has modified how club lengths are measured and published. Our published length specifications for Irons are now approximately 1/4" longer. Note: club lengths haven't changed, only how they are measured and recorded.

Srixon's first super game improvement model, Women's ZXiR HL (High Launch) Irons are made to give female golfers a satisfying, high arcing ball flight path with increased spin. Women's ZXiR HL Irons showcase signature Srixon design and pure feel, with the same cavity back benefits and forgiveness tech as ZXiR, and feature components optimized to fit female swings.

# WOMENS

## KEY INNOVATIONS:

### HIGH LAUNCH DESIGN

ZXiR HL (High Launch) delivers premium Srixon performance and feel with specially tuned specs, lofts, and design to help lower swing speed golfers launch the ball higher, increase spin, and improve stopping power around the greens for optimal playability. All with Srixon's renowned design aesthetics to cosmetically align with the entire ZXi Iron family.

### i-ALLOY

i-ALLOY is a brand-new steel with better feel, created by Srixon. It's significantly softer than the 431 steel commonly used in this category, as well as less dense, while still meeting the strength and durability needs our brand demands.

### MAINFRAME

MainFrame saves additional weight and adds more MOI through an enhanced milled pattern on the back side of the Iron face. At impact, this system amplifies ball speed and adds forgiveness.

### SIGNATURE SRIXON SHAPING

ZXiR HL Irons advance Srixon's renowned design aesthetics into the super game improvement space, while also cosmetically aligning with the entire ZXi Iron family—featuring premium, cavity back badging, confidence-inspiring shaping, and clean topline address profiles.

### TOUR V.T. SOLE

Our Tour V.T. Sole's proprietary combination of sole widths, bounce angles, and notches to ensure a smooth glide through fairway, rough, and sand without any loss of speed.

# COMPARE WEDGE TECH AND FEATURES

A proprietary new steel formula improves feel and unlocks maximum spin, control, and greenside finesse for high-skill players.

Versatility and forgiveness come together in a design that blends perfectly with modern cavity back Iron sets.

Full-face grooves across the largest striking area ever in a CBZ Wedge mean you can confidently hit more challenging open-face shots.

Ultra forgiveness in a 4-Wedge system includes specialized clubs that simplify every short-game shot on the course for complete confidence.

RTZ with Z-ALLOY

# RTZ

All-new RTZ Wedges are made with Z-Alloy, a completely new carbon-steel formula that enables a zero-compromise design approach for incredible feel, better durability, and more consistency for our best performing tour Wedges yet. Plus, there's an all-new ADAPT grind featuring full-face grooves (the only full-face option for this generation), to give RTZ Wedges more versatility than ever before.

## KEY INNOVATIONS

### Z-Alloy

Z-Alloy is a brand-new steel with better feel. It's softer, lighter, and remarkably durable. It gives RTZ Wedges superior feel, better forgiveness, and more consistency. On RTZ Tour Rack Wedges, Z-Alloy's rust-resistant properties ensure longer-lasting, like-new performance.

### HydraZip

HydraZip is a unique system of face blasts and laser-milled lines formulated to maximize spin performance under wet conditions. This technology is dynamically configured by loft groupings, which helps balance spin across lofts, while maximizing spin in adverse conditions.

### ZipCore

This low-density core technology replaces heavier material in the heel and hosel area with a lightweight, low-density, vibration-dampening material. This proprietary core allows us to shift the Center of Gravity closer to where you strike the ball, while simultaneously adding MOI.

### UltiZip

UltiZip's sharper grooves cut through grass and debris at contact, while deeper grooves help make space for grass, sand, dirt, or water to clear the impact zone, giving RTZ Wedges stronger, more consistent spin from the fairway, rough, or bunker.

†To match USGA and R&A industry guidelines, Cleveland Golf has modified how club lengths are measured and published. Our published length specifications for woods are now approximately 1/4" longer. Note: club lengths haven't changed, only how they are measured and recorded.

# CBZ

NEW

New CBZ Wedges bring elite forgiveness and premium versatility together in a highly refined, sharp-looking design that blends beautifully in the bag with modern cavity back or hollow sets, and feature all of Cleveland Golf's latest tour caliber technologies. New this year, the CBZ lineup introduces our proprietary, softer Z-Alloy Wedge material to a cavity back Wedge, along with both traditional and Full-Face groove options.

## KEY INNOVATIONS

### Z-Alloy

Z-Alloy is a brand-new steel created by Cleveland Golf for a better feel. It's softer, lighter, and remarkably durable. It gives CBZ Wedges superior feel, better forgiveness, and more consistency.

### Full-Face Option

Featuring a hosel-to-toe groove pattern and an advanced, high-toe profile, CBZ Full-Face Wedges deliver even greater versatility from any greenside position. Packed with technology, Full-Face is built to help players ace creative, open-face shots.

### ZipCore

This low-density core technology replaces heavier material in the heel and hosel area with a lightweight material. This proprietary core allows us to shift the Center of Gravity closer to where you strike the ball, while simultaneously adding MOI.

### UltiZip

UltiZip's sharper grooves cut through grass and debris at contact, while deeper grooves help make space for grass, sand, dirt, or water to clear the impact zone, giving CBZ Wedges stronger, more consistent spin from the fairway, rough, or bunker.

### HydraZip

HydraZip's face blasts and laser-milled lines maximize spin in wet conditions. Dynamically configured by loft groupings, it balances spin across lofts while enhancing performance in adverse weather.

# WOMEN'S CBZ

NEW

New CBZ Wedges bring elite forgiveness and premium versatility together in a highly refined, sharp-looking design that blends beautifully in the bag with modern cavity back or hollow sets, and feature all of Cleveland Golf's latest tour caliber technologies. New this year, the CBZ lineup introduces our proprietary, softer Z-Alloy Wedge material to a cavity back Wedge, along with both traditional and Full-Face groove options. Women's CBZ Wedges feature specially chosen lightweight components optimized to fit female swings.

## KEY INNOVATIONS

### Z-Alloy

Z-Alloy is a brand-new steel created by Cleveland Golf for a better feel. It's softer, lighter, and remarkably durable. It gives CBZ Wedges superior feel, better forgiveness, and more consistency.

### Full-Face Option

Featuring a hosel-to-toe groove pattern and an advanced, high-toe profile, CBZ Full-Face Wedges deliver even greater versatility from any greenside position. Packed with technology, Full-Face is built to help players ace creative, open-face shots.

### ZipCore

This low-density core technology replaces heavier material in the heel and hosel area with a lightweight material. This proprietary core allows us to shift the Center of Gravity closer to where you strike the ball, while simultaneously adding MOI.

### UltiZip

UltiZip's sharper grooves cut through grass and debris at contact, while deeper grooves help make space for grass, sand, dirt, or water to clear the impact zone, giving CBZ Wedges stronger, more consistent spin from the fairway, rough, or bunker.

### HydraZip

HydraZip's face blasts and laser-milled lines maximize spin in wet conditions. Dynamically configured by loft groupings, it balances spin across lofts while enhancing performance in adverse weather.

# SMART SOLE FULL-FACE MEN'S

This completely new Wedge system now includes four specialized clubs to fulfill every short-game shot on the course, giving you the complete package. Featuring the largest striking areas we've ever put on a Wedge, plus dynamic HydraZip and UltiZip technologies, Smart Sole Full-Face is now even more forgiving than before.

## KEY INNOVATIONS

### A Wedge For Every Shot

Bump-and-run it with the Chipper. Get full swing forgiveness with the Gap. Easy bunker escapes with the Sand. And short-side pin confidence with the Lob.

### Larger Faces

Our largest faces ever on any Cleveland Golf Wedges, new full-face grooves, and improved MOI makes these the most forgiving Wedges we've ever made.

### HydraZip

Our proprietary dynamic blast and laser-milled line system creates roughness to enhance friction, maximizing spin in wet or dry conditions, and from anywhere around the green.

### UltiZip

UltiZip's full-face network of sharp, deep, and tightly spaced grooves maximizes performance at contact. By slicing through and channeling debris to bite harder, UltiZip offers purer spin, more control, and more consistency.

### Upgraded Three-Tiered Soles

This all-new, extra wide, Three-Tiered Sole design with added leading edge bounce provides maximum forgiveness from the fairway, rough, tight lies, or out of the sand.

# CLEVELAND PUTTERS

# HB SOFT 2 BLACK

HB SOFT 2 Black takes our Speed Optimized Face Technology to all-new levels of true swing feel by syncing every head shape with balanced, stroke specific components. So all you need to do is choose the right stroke type and head shape for you, and we'll set up everything else to spec to get consistent distance performance in a finely tuned, near-custom Putter for an optimal price.

## KEY INNOVATIONS

### UST MAMIYA ALL-IN SHAFT

UST Mamiya ALL-IN shafts feature advanced stability and the feel of a multi-material shaft. Their optimally balanced designs use high-tensile carbon fiber and proprietary nanoalloys to add stiffness, strength, and consistency.

### SPEED OPTIMIZED FACE TECHNOLOGY

A dynamic groove milling pattern on the face of every HB SOFT 2 Black Putter, SOFT normalizes ball speed across an enlarged striking area—ensuring more consistent, predictable distance performance.

### STROKE SPECIFIC DESIGNS

HB SOFT 2 Black features nine all-new Putters carefully assembled for straight or slight arc stroke types, each synced with its complementing hosel style, toe hang, alignment system, and grip.

### CONSISTENT SWING FEEL

To ensure each HB SOFT 2 Black Putter has a consistent swing feel—model to model—no matter which shaft length you choose, a 20g weight is included within the butt end of the shaft on all models 35" and over.

# HB SOFT 2 CB & BROOM

HB SOFT 2 takes our Speed Optimized Face Technology to all-new levels of true swing feel by syncing every head shape with balanced, stroke specific components. The BROOM and CB variants offer smoother, more controllable strokes for those players who prefer that feeling on the green.

## KEY INNOVATIONS

### HB SOFT 2 CB

Compared to existing HB SOFT 2 models, the HB SOFT 2 CB putter features a heavier head weight and a longer shaft and grip to concentrate weight above the players hands for a slower, more consistent stroke.

### HB SOFT 2 BROOM

A proven tour-winning putter style; the HB SOFT 2 BROOM Putter facilitates a "straight back, straight through" putting stroke to encourage the putter to move on less of an arc and limit wrist movement associated with inconsistencies in a traditional putting stroke. A specially designed grip as well as a heavier putter head complete the "Broom style" putter package.

Offered in two stock lengths to cater to different heights.

### SPEED OPTIMIZED FACE TECHNOLOGY

A dynamic groove milling pattern on the face of every HB SOFT 2 Putter, SOFT normalizes ball speed across an enlarged striking area—ensuring more consistent, predictable distance performance.

### STROKE SPECIFIC DESIGN

HB SOFT 2 features nine all-new Putters carefully assembled for straight stroke types, each synced with its complementing hosel style, toe hang, alignment system, and grip.

### RETREVE

RETREVE—a completely new head shape configuration in the Cleveland Golf Putter world—is our first-ever Putter with the ability to pick your ball out of the hole or easily off any other surface, so you don't have to bend over and grab it.

# HB SOFT MILLED

The HB SOFT Milled line of Putters provides a premium combination of features and technologies at an irresistible price point. With a new, affordable milling process, they make milled precision attainable.

## KEY INNOVATIONS

### MILLED HEADS

First cast, then CNC Milled for precise weighting and crisp lines. It's smarter milling that reduces waste for an attainable cost.

### SPEED OPTIMIZED FACE TECHNOLOGY

Ensures consistent speed control and distance performance by normalizing ball speed across the face of the Putter. Now with more responsive feel.

### STROKE-FIT ALIGNMENT & GRIP

Each shape features a specific alignment scheme and grip designed to fit the stroke of that Putter.

# NOTES

TOWARDS A SUSTAINABLE FUTURE:

# SUMITOMO RUBBER GROUP LEADS THE WAY

Taking to heart our responsibilities as a leader in the sporting goods industry, we are working to achieve our goal of reducing the amount of plastic used in our product packaging by half by the year 2030. We also aim to overcome the challenges of creating the ultimate eco-friendly balls, made using 100% sustainable raw materials, by the year 2050. We're always thinking about how we can create a sustainable future for the world of sports, and we will continue working to expand our team for ongoing action.

## 1. 🌱 KEY ENVIRONMENTAL GOALS

- Cut CO2 Emissions
- Increase Biomass & Recycled Materials Usage
- Develop Sustainable Products

## 2. 🏌️ INNOVATIVE ECO-FRIENDLY GOLF BALLS

- **Srixon Z-STAR+e** : A groundbreaking sustainable golf ball concept (not for sale yet).
- It uses **biomass-based urethane** from corn, cutting CO2 emissions during production compared to petroleum-based materials.
- **Environmental impact** : A potential **30.7-ton CO2 reduction**, equivalent to **3.1 million plastic bottles** saved globally!

## 3. ♻️ SETTING NEW STANDARDS FOR SUSTAINABILITY

- **Internal Sustainable Standards** : These consider CO2 emissions, biomass content, and recycled materials.
- Targets: 20% sustainable raw materials in practice golf balls by 2030, and 100% by 2050.

## 4. 🗑️ PLASTIC REDUCTION INITIATIVES

- Targeting a **40% reduction** in global plastic use by 2030, compared to 2019 levels.
- Sports Business is on track to reduce plastic in **golf ball packaging by 50%** by 2030.
- Examples: Phasing out window films since 2021 and eliminating silver foil in packaging by 2024.

## 5. 🎯 SUSTAINABILITY IN ACTION

Sumitomo Rubber Group is revolutionizing its approach to sustainability, from eco-friendly golf balls to reducing plastic waste, all while maintaining premium product standards. The future of sports is green!

ENVIRONMENTALLY FRIENDLY

# BALL PACKAGING

## ♻️ REDUCING PLASTIC USAGE

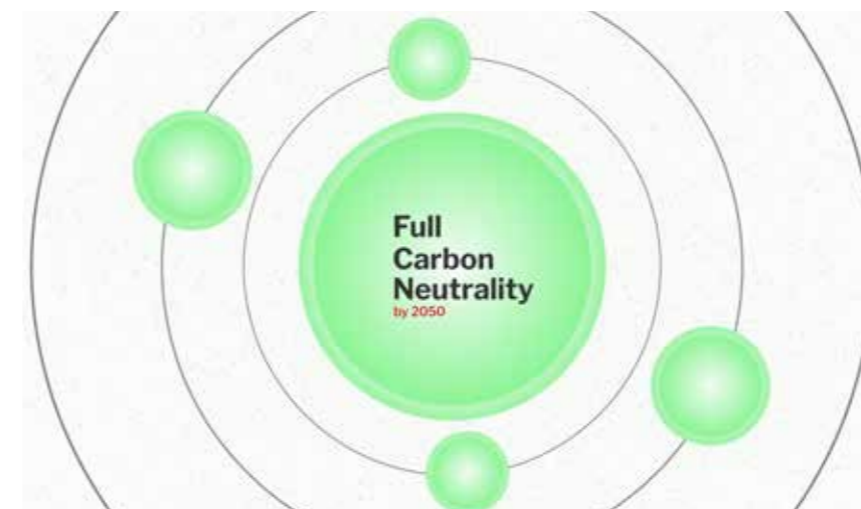

- **NO WINDOW FILM ON PACKAGES FROM 2021 AUTUMN MODELS.**
- **SLEEVE WITHOUT SILVER FOIL WILL BE INTRODUCED SEQUENTIALLY FROM 2024 MODELS.**

**TARGET : REDUCING OUR TOTAL PLASTIC USAGE BY 50% BY THE YEAR 2030.**  
(COMPARED WITH 2019 LEVELS)

## 🌱 INTERNAL STANDARD FOR SUSTAINABLE PRODUCT

- **CURRENTLY 53% OF SUSTAINABLE RAW MATERIAL FOR GOLF BALL**

**TARGET : CREATE THE ULTIMATE ECO FRIENDLY BALLS USING 100% OF SUSTAINABLE RAW MATERIAL (2050)**

## 🏭 CARBON NEUTRALITY

- **50% REDUCTION IN EMISSIONS IN 2030**
- **ACHIEVING & MAINTAINING COMPLETE ZERO EMISSION AT OUR MANUFACTURING BASES**

ICHIJIMA FACTORY (GOLF BALLS) : 0 EMISSION FROM 2005  
MIYAZAKI FACTORY (GOLF CLUBS) : 0 EMISSION FROM 2006
